EXPERIENCE

Glimmernet Technologies, Bethesda, MD
Web Developer & Designer

Aug 2017 - Present

- **Project Management & Development Leadership:**

Successfully manage a diverse portfolio of over 70 website development projects, showcasing adaptability and expertise across various industries and client requirements. Lead the full life cycle of website development projects, overseeing from conception to deployment, ensuring seamless execution and client satisfaction.

- **Client Communication & Satisfaction:**

Maintain a reputation for delivering exceptional work, effective communication, and timely solutions, consistently achieving high levels of client satisfaction. Proactively engage with clients to understand their needs and ensure precise execution of all requests.

- **Technical Expertise:**

Design and develop responsive websites using WordPress, employing HTML5, CSS3, JavaScript, and PHP to ensure cross-browser compatibility and optimal user experience.

- **Responsive Design & Cross-Browser Compatibility:**

Develop responsive websites optimized for multiple screen sizes and ensure compatibility across various browsers, ensuring a seamless user experience regardless of device or platform.

- **Design Integration:**

Transform design concepts from Photoshop files or Figma into functional websites, ensuring fidelity to the original vision while optimizing for web performance.

- **Project Estimation & Consultation:**

Provide accurate project time estimates, balancing client expectations with realistic development timelines.

- **Bug Fixing & Performance Enhancement:**

Implement bug fixes and performance enhancements on existing websites, significantly improving functionality and speed.

- **Presentation & Client Engagement:**

Conduct presentations and demos to showcase project progress, maintaining transparent communication and keeping clients informed throughout the development process.

- Developed mobile-first dynamic and interactive websites from PSD files that increased page visits and sales revenue.
- Created website layouts using CSS framework (Bootstrap).
- Implemented functionalities to websites using JavaScript (jQuery).
- Maintained old websites (updated content and applied new designs and functionalities).
- Designed a dashboard for the company's custom Content Management System (CMS).
- Made content changes in MySQL database and created update scripts.
- Mentored a new developer joining the team.
